## How to Install Terminal on Mac OS

The client terminal can be installed and run on computers with Mac OS using Wine. Wine is a free software that allows users of the Unix-based systems to run an application developed for the Microsoft Windows systems. Among all the Wine versions there is one for Mac OS.

Note that Wine is not a fully stable application. Thus, some functions in the applications you start under it may work improperly or not work at all.

For the installation on Mac OS we recommend to use the free application PlayOnMac. PlayOnMac is a Wine-based software for easy installation of Windows applications on Mac OS.

## PlayOnMac Installation

1. To install PlayOnMac, open the product's official web site, move to Downloads section and click the link for downloading the latest version.

2. After downloading the DMG package, launch it from Downloads section of your system.

3. PlayOnMac first launch window will appear. After clicking "Next", the installer will start checking and installing the various components necessary for work.

		Next Cancel

5. If you have already installed XQuartz or want to install it later, select "Don't install XQuartz for the moment" or "I've downloaded file by myself", respectively.

XQuartz installation is performed in several stages. First of all, you should read the important information (Read Me) and accept the license conditions.

6. Before the installation, Mac OS security system will ask you to enter your account's password:

000	Install XQuartz 2.7.4_rc1
	Standard Install on "Macintosh HD"

8. After restarting the system, launch PlayOnMac again from the setup file in Downloads folder. The first launch window will appear again. This time, the installer will offer to install MS Windows fonts necessary for correct operation.

9. Accept the license agreement conditions and wait till the installation is complete. After that, PlayOnMac is ready for use. Its main window will appear.

## Updating Wine

Wine v. 1.4 is installed together with PlayOnMac. Wine 1.4.1 is the latest stable version at the moment. Wine 1.5.21 beta release containing many improvements is also available for download. However, it may be less stable. It is recommended to install the latest version of Wine.

1. To upgrade Wine to the latest version, open PlayOnMac upper menu and select Manage Wine Versions:

2. The window with Wine versions available for installation will open. Select the latest version (1.5.21 at the moment).

3. Move the latest Wine version to the right side of the window. The installation will start.

4. After the installation is complete, the new version of Wine will appear in the left part of PlayOnMac Wine versions manager window. You can then close the window and install the trading terminal.

## Terminal Installation

1. To install the terminal, download the installer "mt4setup.exe". After the download is complete, launch the setup file. PlayOnMac will be used automatically to open it.

2. The standard terminal installation process with all its stages will start.

 When the installation is complete, PlayOnMac will offer you to create the shortcuts for the terminal components - the client terminal itself and MetaEditor.
